

A+ Brain Care

Multidisciplinary mental health center

All about our center

1 A **multidisciplinary mental health center**, offering a wide range of therapies to cater to the diverse mental health needs of our patients

2 Our therapies include **Psychiatry, Clinical Psychology, Psychotherapy, Speech & Language Pathology, and Psychomotor Therapy**

3 A unique of its kind center where a **Team of Professionals** from different backgrounds work together to look after each case. Each patient is followed by the whole team, through regular meetings and under the supervision of our psychiatrist Dr. Fouad Tahan

Why choosing A+ Brain Care?

- » **Confidentiality** is our golden rule to protect our patients' privacy
- » We only use **Genuine & High Quality** assessment and therapy tools and materials to insure reliable diagnosis and therapy
- » **Online* & Home** Services**
- » Customized **Therapeutic Architecture** procures a safe and natural environment in support of a healthier lifestyle
- » **Free underground parking**

Why it matters?

Mental and physical health are equally important components of overall health

For example, depression increases the risk for many types of physical health problems, particularly chronic diseases like diabetes, heart disease, stroke and cancer

Similarly, the presence of chronic conditions can increase the risk for mental illness

* Online services are available for psychiatry and psychotherapy, and for specific cases of speech and psychomotor therapy.

** Home services are available mainly for speech and psychomotor therapy, for elderly people and for kids with special needs.
